

WELCON TECHNOLOGIES Capability Statement

Welcon Technologies provide end-to-end **Electrical Engineering** projects and solutions for clients in the following market sectors:

Port Facilities & Infrastructure
Water Pumping & Treatment
Coal Mining & Processing
Aluminium Smelting
Alumina Refining
Chemicals
Oil & Gas
Food Processing
Materials Handling
Cement Manufacture
Waste Water Treatment
Renewable Energy Systems
Minerals Mining & Processing
Power Generation & Distribution

Specialist Skills include:

Project Management
HV Distribution & Switchroom Design
Power Systems Analysis
Protection Coordination
HV Switchyard Design
HV Auditing
Electrical Systems Design
Control Systems & Automation
Computer Aided Design
Engineering Drawing Management
Arc Flash Mitigation

Assisting our Clients:

Deliver Safe Workplaces
Increase Plant Productivity & OEE
Improve Process Efficiency
Reduce Energy Consumption

Full Turnkey Solutions for EIC Projects are also provided through our relationships with a number of industrial electrical contractors.
